Professional Summary

Fourth-year BSIT student at New Era University and current Networking Intern at SSS Main Branch, focused on cloud infrastructure and cybersecurity. Hands-on AWS projects and freelance integrations cover cloud services, authentication, access control and API reliability, supported by networking fundamentals.

Core Skills

Cloud - Amazon Bedrock, AWS Lambda, S3 Vectors, API Gateway; Oracle cloud foundations.

Cybersecurity - OAuth 2.0, JWT validation assessment, authentication, access control, input and webhook validation.

Networking - TCP/IP, DNS, networking fundamentals, systems troubleshooting.

Development - Python, JavaScript/TypeScript, React, Node.js, REST APIs, GitHub, n8n, Make, Zapier.

Experience

Networking Intern | SSS Main Branch - Current internship.

Freelance AI Automation Specialist | Remote | 2023-Present - Implemented OAuth 2.0 and webhook integrations; applied validation, error handling and retries; troubleshot API connections and system reliability.

Selected Projects

Neubie University RAG Chatbot - Built document ingestion, retrieval and response generation with Bedrock, S3 Vectors and Lambda. Capstone in development; mock-data testing; separate demo API deployment pending.

JWT Validation Security Assessment - Assessed signature verification, algorithm confusion and token expiration in an OWASP Juice Shop lab; documented authentication risks.

NEU Hall Reservation and Events - React, Express and MongoDB platform with JWT roles and booking conflict detection. Contributed full-stack development and Scrum Master coordination, 2025-2026.

CondoConnect formerly DormAssist - React/TypeScript and Supabase booking prototype with customer, staff and admin access. Payments are simulated; deployment prerequisites remain.

Photobooth Event Automation - Customized PhotoboothProject v4 with PHP/PowerShell printing, duplicate-job protection and QR downloads. Used by over 100 attendees at the NEU UAPSA General Assembly.

Sibol House - Built an agency website with React, interactive Three.js visuals, GSAP animation and filterable case studies.

H2-dO - IoT research and prototype design for ESP32 hydration sensing; proposed Flutter, Node.js and MongoDB architecture. Implementation and validation ongoing.

Additional projects - Healthcare Management, Weather API Management and Secure Utilities systems in Python.

Certifications

Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate

Oracle Cloud Data Management Foundations Associate

Oracle Cloud Infrastructure Foundations Associate Badge

Above credentials: issued Dec 2024; expire Dec 2026.

SQL and Relational Databases 101 | Oracle | Issued Oct 2024; expires Oct 2027

CS205: Building with Artificial Intelligence | Saylor University | Issued Oct 7, 2026

CS402: Computer Communications and Networks | Saylor University | Issued Oct 15, 2026

CS406: Information Security | Saylor University | Issued Oct 16, 2026

Education

BS Information Technology | New Era University - Fourth year | Expected graduation 2027.

Coursework: Networking, Systems Administration, Information Assurance and Security, Data Communications.
